

## Nutsche Filter

**Ablaze Nutsche Filter** are specially designed for effective filtration and can be conveniently combined with our standard reaction units to enable solid-liquid separation.

All contact parts are inert and hence allow the same equipment to be used with a wide range of chemicals and solvents. Appropriate filter is used to separate the solid particles of the slurry, forming a filtered cake. The filtrate drains to the bottom and can be collected from the bottom outlet valve.

The filter cake can be easily removed from the top with the help of quick release coupling.

### Salient Features:

- High Filtration Efficiency
- Completely Sealed Mounting System
- Ease of Use and cleaning
- Customized Nozzle Orientation for varied applications
- Transparency, inertness and corrosion-resistance

**Capacity:** Up to 200Litre

**Pressure:** Up to +1 Bar G

**Temperature:** Up to 200°C

**Filter Cloth:** Various Mesh Size and MOC available as per requirement

**Material of Construction:** Borosilicate Glass, PTFE

Customized Configurations available as per requirement.
